 **Eggersmann**
Recycling Technology

**TWO SPECIALISTS,
ONE POWERFUL SOLUTION
FOR THE RECYCLING INDUSTRY**

Reliable cooperation for demanding recycling applications

When two specialists join forces, solutions are created that really make a difference. **LBS**, manufacturer of high-quality rubber and synthetic conveyor belts, and **Eggersmann**, international producer of mobile and stationary recycling machines, work together with one goal: **to create machines that perform reliably, efficiently and sustainably worldwide.**

Since the beginning of their collaboration, LBS has been supplying conveyor belts that are perfectly tailored to the high demands of modern recycling plants. Robust, stable and low-maintenance, so that machines continue to run continuously even under heavy loads and with abrasive materials.

Eggersmann particularly appreciates LBS's **expert advice, flexibility and rapid communication.** Whether it concerns standard solutions or time-critical, tailor-made projects, LBS thinks along with us and delivers practical solutions without delay or additional costs.

“The consistent quality of LBS gives us and our customers operational security worldwide.”
– Eggersmann Recyclingmaschinen

“LBS thinks along with us technically and translates our requirements directly into practical, reliable solutions.”
– Eggersmann Recyclingmaschinen

The consistent quality and reliability of the conveyor belts ensure predictable production processes, minimal downtime and greater process reliability, resulting in satisfied customers and more efficient machine production worldwide.

Together, LBS and Eggersmann are not only building machines, but also a future full of innovation. Their combined expertise is resulting in new conveyor belt variants and improved solutions for the most demanding recycling applications. This collaboration is a strong reference and demonstrates that quality, reliability and technical precision are possible worldwide.
