AQUAMATOR BELT

endless in service and innovation

Introduction

LBS Conveyor Belts BV, which has a quarter of a century of experience of producing belts for different sectors, is a leader in its field. Over the years, we have come to play an innovative role in different industries by continually improving our materials and production methods.

LBS has been designing and engineering rubber conveyor belts for, amongst other, the construction and recycling industry. From our production facility in the Netherlands, with > 6.000 m² production area and over 100 employees, we produce standard and tailor-made solutions for your needs.

Our high quality and extensive stock of rubber conveyor belts and highly automated production processes ensure high quality and reliable

products. Renowned OEM brands within, amongst other, the construction and recycling industry rely on our rubber conveyor belts as a part of their high quality products.

The Aquamator belt consists of a Probelt® base belt, which is cross-rigid, and hot vulcanized endless. Both sides of the belt have fabric reinforced sidewalls. The Aquamator belt is made endless by means of hot vulcanization (original factory splice). According the highest quality standards within LBS. Aquamator belts are effective and efficient for washing out specific and light pollution existing in mineral grain like sand, grit, gravel and construction rubble.
